Sequence 12, Application US/07745206A
Patent No. 5429921

GENERAL INFORMATION:
APPLICANT: Harpold, Michael
APPLICANT: Harpold, Michael
APPLICANT: Holdman, Daniel
TITLE OF INVENTION:
APPLICANT: Feldman, Daniel
TITLE OF INVENTION:
Methods

INTERSONDENCE ADDRESS:
CORRESPONDENCE ADDRESS:
ADDRESSE: Fitch, Even, Tabin & Flannery
STREET: 135 S. LaSalle
CITY: Chicago
STATE: Illinois
COUNTRY: U.S.A.

ZIP: 60603
ZIP: 60603
ZIP: 60603
ZIP: FOODS/MS-DOS
SOPTARE: Patentin Release #1.0, Version #1.25
CORPUTER: BADBLE FORM:
MEDIUM TYPE: Ploppy disk
COMPUTER: LIMP C Compatible
OPERATING SYSTEM: PC-DOS/MS-DOS
SOFTWARE: Patentin Release #1.0, Version #1.25
CURLETT APPLICATION INFORMATION:
ARPLICATION INFORMATION:
NAME: Feder: SCOCT B
REFERENCE/DOCKET NUMBER: 51504
TELEPHONE: 312-372-7842

//clone lib="NIA Mouse 15K cDNA Clone Set"
//note="Vector: pspORT1; Site 1: SalI; Site 2: NotI; This
clone is among a rearrayed set of 15,247 clones from 11
embryo cDNA libraries (including preimplantation stage
embryos from unfertilized egg to blastocyst, embryonic
part of E77.5 embryos, extraembryonic part of E7.5
embryos, and E12.5 female mesonephros/gonad) and one
newborn ovary cDNA library. Average insert size 1.5 kb.
All source libraries are cloned unidirectionally with
Oligo(dT)-Not primers. References include: (1)

The sequence contained an oligo-dT track that was present in the oligonucleotide that was used to prime the synthesis of first strand cDNA and therefore this may represent a bonafide poly A tail. The sequence tag present in the cDNA between the NotI site and the oligo-dT track served to identify it as a clone from the normalized basal ganglia library cDNA Library Preparation: M.B. Soares Lab Clone distribution: NIH BMAP cDNA clones will be made available by the means that is soon to be determined. When NIH determines the means for distribution of the BMAP cDNA clones, this record will be updated accordingly when that means is determined. Seq primer: M13 Forward POLYA=Yes.

/clone lib="nut is a subtracted library derived fro normalized libraries from ten regions of the mouse brain (cerebellum, brain stems, olfactory bulbs, hypothalamus, cortex, amygdala, basal ganglia, pineal gland, striatum, hipoccampus). The driver used for subtraction consisted of a pool of 20,000 cDMA clones obtained from non-normalized and normalized libraries of these ten regions of the mouse brain.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    organism="Mus musculus"

//Other="Vector: pT713D-Pac (Pharmacia) with a modified polylinker; Site 1: Not I; Site 2: Eco RI; The NH BMAP M S4 library is a subtracted library of a series, ultimately derived from a mixture of individually tagged normalized libraries from ten regions of the mouse brain (cerebellum, brain stems, olfactory bulbs, hypothalamus, cortex, amygdala, basal ganglia, pineal gland, striatum, hipoccampus) after a series of subtractions to reduce the representation of cDNAs from which ESTs had already been generated. The following serially subtracted libraries were generated in this process: NIH_BMAP_M_S4, NIH_BMAP_M_S3.3, NIH_BMAP_M_S4, NIH_BMAP_M_S4, NIH_BMAP_M_S3.1, NIH_BMAP_M_S3.2, NIH_BMAP_M_S3.1, NIH_BMAP_M_S3.1, NIH_BMAP_M_S3.1, Clones from which 3' ESTS had been derived was used as a driver in a hybridization with a pool of the NIH_BMAP_M_S3.3, NIH_BMAP_M_S3.2, and NIH_BMAP_M_S3.3, N
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Conservative
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 /dev_stage="27-32 days"

Pred. No. is the number of results predicted by chance to have a

score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
